a rity needs in public land is four times what it considen necessary. If five arres are needed for storage of sand and gravel and city trucks, take 15.—the for expansion and five for a landscaped belt to shield the unsightliness and dust and noise. If three acres are needed for a chool, take 30, and make the school facilities serve double purpose as the couler of a neighborhood park and playfield. If a lot here and there has no use at all, but will only tring a few dollars on the market, plant it with needs and let it breathe dool refreshment to all who pass, and beckon children from the pavements up play in its pleasant shade. Far better is it to have surplus land giving a return in pleasure to the trizens than to have tilt lying, weed-grown and useless, as abandoned property.

Judges Should World.

Judges Should Work More

Judges Should Work More

A judge is an individual hired by the public to use his knowledge of law and justice in the settlement of civil and criminal disputes. He is paid from public taxes that the state of the one of the state of the stat

Fickle Legislatures

FICKIE Legislatures

Word coins down from the northern section of Michigan that the next Legislature will writnes a fight to rescaind the recent special session's act to return all weight tax money to the respective counters after January 1. In other words, the folks up north war more of the highway funds diverted to road building up their way, and less to tax-burdened counties for relief. It is northern boys at successful, one of Coverno Brucker's chief "accomplishments" will have vanished into the mere limbs of folitical promise. Let's hope that the new act will be given a chance to operate.

A RECENT ROUMANIAN decree bans all games of chance. Except life itself.

It is sain that the most valuable farm product today is milk. And the reason perhaps is that the farmers themselves are being milked.

LAST YEAR AMERICAN HOTELS used 10,000,000 dozen eggs. That is something to crow about.

All of Us

-By Marshall Maslin-

I BOASTED of my luck, so far, and moved to knock on the nearest wood. . I and would not let it knock. Such foolish
