**What makes the DIFFERENCE**

in the size of these two—

Mr. and Mrs. H. H. Clegg

1932

**ROASTS?**

Both roasts weighed five pounds when put in the oven. Now one of them weighs nearly 10 percent less than the other. What does this mean? The smaller one was cooked in a flame-type oven. There is nothing one matter with it—it is just a break. Part of the ham evaporated.

Now look at the larger roast. It was cooked in an Electroheat. Weighing five pounds when it was put in the oven, it still weighs almost five pounds when taken out. There has been practically no evaporation or weight loss. The Electroheat does a better job.

**MORAL:** Are you paying more for meat than you need? You can eat choice cuts of meat and save money. The Electroheat Electric cooking effects a definite
