LET HOT WATER HELP WITH THE HOUSEWORK

You can make housework easier and much pleasanter if you will let electric hot water service help you. Many women do not realize in how many ways hot water can add to the efficiency of housework.
Drying dishes is one of the tiresome kitchen tasks that can be eliminated when there is piping hot water on tap. The Cleanings Institute in a bacteriological study of dishwashing has found that rinsing dishes with very hot water actually leaves them cleaner than wiping with an ordinary dish towel.
Certain fresh stains can be effectively removed from table linen by stretching it in ambulatory hoops and holding it under the running faucet. Coffee, tea and various fruits yield to hot water. Starting vegetables in boiling water shortens the time of cooking, decreases the loss of food value and helps them to keep their color.
When you wash windows, mirrors, or glassware, add a little starch to the water. Starch helps to remove the dirt, and gives the glass a bright polish.
To keep electric bulbs at their brightest, dust them frequently and wash in lukewarm, soapy water every few months. Wash only the glass bulb and be sure that it is completely dry before screwing it back into the fixture.
Hot water service is essential in the kitchen, the bath and the laundry.
AS LITTLE AS \$10 FIRST PAYMENT (that includes in cost-ventured monthly payments) places an electric hot water heater in your home.
