Important Trifles: Why does a meringue fall? Because it has been baked at too high a temperature for too short a time. Two cups whites and four cups spoons of sugar are enough for a nine-inch pie. Beat the eggs until stiff and fairly dry. Fold in the sugar quickly and pile lightly on the prepared pie. Bake in shallow over 300 degrees, for 20 minutes.

Why does a fruit cake break or crack when removed from the tin? Probably because it was removed when still very warm. Fruit cakes should be cooled in the pan.

Odors Reflect Times: The odors used by women reflect the times in which they are living according to Lucien LeLong. When women were completely married, they used overperfumes, flower scents were the vogue in the Victorian era, post-war perfumes were heavy, 1923-24 scents were "blue" whistles and "blue" overpowering. A Long evening dress of white crepe elegantly trimmed with white flowers and green leaves is sketched.
