Beeskeepers To Hold Meet Near Bay City

Beeskeepers of this vicinity are planning to attend the annual meeting of the Michigan Beeskeepers Association Inc. and at the home of Oscar H. Schmidt, near Bay City. The program includes a banquet and tour of apiaries in the Saginaw Valley.

The Michigan honey crop is worth nearly a million dollars each year, apiarists say, and the necliar is gathered by the bees from a restricted list of plants. The chief contributors to the honey supply are alisike, white and sweet clover, milkweed, basswood, wild raspberry, and frowweed.

The production of honey is a source of income for 25,000 Michigan residents. Prospects for a fair crop of honey this year have been expressed. Though the June and early-July drought ruined expectations of a record output.

between bondholders and delinquents were removed in the last session of the State Legislature by Act 133 offered by State Senator A. Moore of Pontiac.

Birmingham's delinquent taxes have been estimated at upwards of \$700,000 by Harold H. Corson, acting city treasurer. He has about \$300,000 in special assessment district bonds and the remainder in general obligation bonds. There are \$1,778,015 worth of bonds outstanding in the city now, Mr. Corson said. But he said that a large percentage of this figure is not due until 1950 or 1960. Of this figure \$78,640 is in general obligation bonds, \$383,275 in water department bonds, \$453,100 in special assessment district bonds and \$250,000 in tax notes outstanding.

"The size of the figure on outstanding bonds should not frighten anyone," Mr. Corson cautioned. "As it was pointed out by the city manager, if I had lost and figured my grocery bill for the next 30 years or for the last 30 years, it would be appalling, but if I figured it by year it would not be so large. The same thing is true of the bonds, as many of them are not due for nearly 30 years."

on without parking purchases because they could not park conveniently in the parallel spaces. Mr. Wilson declared, "Since the angle system was in effect, we have noticed a decided difference in the number of our women customers who are attributable to the new parking."

J. J. Kaplan, manager of a meat market, agreed with Grover Cook, druggist, that the system would only have had a fair trial when lines had been painted on the street to guide parkers and signs of adequate dimensions placed at the ends of the streets to warn motorists of the change in parking regulations.

"It is no question but that the police of Birmingham are co-operating and that they are as efficient as a department could be found in any city of this size," Mr. Cook said. "Their task is vastly complicated by the difficulty of apprehending large groups of motorists who have not had sufficient warning of the lower limit."

The money already giving Birmingham a "black eye" in the minds of transient motorists is negligible, Mr. Cook declared. "Grand Rapids and Lansing both have low speed limits and enforce them strictly," he said. "Neither of those cities are called speed traps."

An appeal to merchants not to expect special consideration in parking their cars overtime in front of their places of business was also expressed by Mr. Cook.

CHRYSLER SALES OVER WHOLE 1932 FIGURE

A further surge of the business upturn in the motor industry is seen in the announcement by the Chrysler Motor Corporation that sales to dealers and distributors by July 21 had exceeded by 4 percent the total number of cars shipped in the entire year 1932.

Sales for the first six months of 1933 almost equaled the total 1932 sales. Chrysler officials announced Plymouth and Dodge also exceeded their total sales for 1932 in the first six months of 1933. Plymouth in six months sold 4.6 per cent more cars than Dodge during all of last year and sold 4.8 per cent more passenger cars and 17 per cent more trucks than in all of the preceding year.
