WOMEN'S CONTRIBUTION TO THE MOTOR CAR

There is no doubt that people care to hear very much about what goes on under the hoods of their cars.

Well, it is not essential to talk "shop"; let us talk Realism. Smoothness. Drive the Ford V-8 and you will find that the machine runs with a surprising smoothness, due to its design and the extra-precise methods of its manufacture.

Power. Where it is, 75 horsepower (we could say 80) at the drive-shaft for the driver's use. With less weight to pull around, the settle of this car is its life-like response - is rather remarkable.

Economy. Our V-8 develops more power on a gallon of gasoline than any car we have made. Mileage is partly a matter of individual driving, but under average conditions the Ford V-8 does 17 to 20 miles a gallon.

Appearance. This is woman's contribution. The motor car must not only be useful, but also good-looking. View the Ford V-8 and you will not need our word on its fine appearance.

Comfort. This also is woman's concern. In 30 years she changed the motor car from a wagon to a coach. Comfort is a quality made of numerous ingredients. There is no comfort without a quiet, smooth-running motor. We have all the other ingredients too - only good taste, quality, ease, safety, roominess and convenience.
