WATER PROTECTS RUBBER

that's why you get 30% more mileage by getting new Goodyears now!

COULDN'T you want the slip of tough new rubber between your brakes and the road in fall and winter—when there's more slippery driving than any other time in the year.

And now—scientific tests prove that tires "broken in" during wet, cold weather average 20% more total mileage. Hot summer roads make tires wear faster.

But roads are cool in winter—and most of the time they're wet. That means danger when your tires are thin and worn. But it means protection for stout new rubber, because the water prevents rapid wear by preventing friction between the tire and the road.

Can you afford to wait till spring when new Goodyear Pathfinders are selling today at prices just about the same as a year ago?

Not on your life! Get new Goodyear Now!
