Deposit Insurance Individual Management

The banking system of this country is of such widespread influence and importance that legislation which strengthens the entire system is undoubtedly desired. Thoughtful bankers are in accordance with wise legislation of this nature which aims at greater stability and the fullest protection to depositors.

Deposit Insurance at this time is a necessary step toward that goal of our President, namely, the restoration of normal business activity in this country.

Banking laws, however, can only supplement and cannot take the place of or supersede brudence, care and ability on the part of the individual institution. The safety and usefulness of our banking system base their foundation in good nanagement.
