Just A Drop of Chemical --BUT What It Means to Health

A single drop of chemical—unimpressive and possibly uninteresting. But what a big story it can tell when it's a part of a doctor's prescription! If it's weak—or too strong—or mixed with impurities—it may help in spoiling every aim of the drugs the doctor has specified. That's why we're careful—not only in buying our drugs and selling them—but in mixing them. That's why we're careful with everything we offer in our store—to make sure that every item is as fine, as pure, as safe as money can buy—and ever watchful of a chance to save money for you.
