**CARESS**  
of Soft Water

If you have always used hard water, you may not even realize how good soft water feels on your body. How generously soft water yields its lather. How soft and clean it leaves your skin and hair. Nothing ever gets really clean in hard water. It reacts with soap to form a sticky, insoluble curd that no amount of rinsing removes. You can see the curd on the tub, on dishes, on clothes and linens... feel it on your body after a bath. But, fortunately, the hardest water can be tamed. A Permutit Water Conditioning installation attached to your household water supply pipe does the trick. The water goes in hard. It comes out softer even than rain water. And the most surprising part is that this greatest of household luxuries is not expensive. You can install it under the FHA plan and the savings will meet the payments. Learn all about conditioned water. Write for free booklet.
