**FORD V-8 ECONOMY MEANS HIGH "Dollar Mileage"**  
(MORE MILES PER DOLLAR)

- ONLY THE FORD V-8 GIVES YOU ALL THESE FEATURES
1. V-8 ENGINE PERFORMANCE WITH ECONOMY
  2. SUPER-SAFETY MECHANICAL BRAKES
  3. SAFETY GLASS ALL AROUND AT NO EXTRA CHARGE
  4. WELDED STEEL BODY—STEEL STRUCTURES—WELL SURFACE
  5. CENTER-POISE RIDING COMFORT

NO MATTER how you classify your expenditures for car up-keep—it's your total expenditure that counts. How much "dollar mileage" is your car giving you?  
Dollars do go farther in the Ford V-8. Modern improved carburetion gives you unusual gasoline mileage with brilliant V-8 performance. Most owners of today's Ford change oil only every 2000 miles and add none between changes.  
And after the first few thousand miles you begin to understand what Ford V-8 "dollar mileage" really means.

It gives you more miles per dollar because it gives you all-round economy—low first cost, low up-keep cost, low depreciation and long life—as well as low gasoline and oil consumption. All these are big items if you aim to buy the most economical car.

of the meeting while Harold Webster served as program chairman for the day.  
City Manager James W. Parry was the first speaker to discuss the question, "What Can a Group of Business and Professional Men do to Better the Organization with which They are Connected?" He expressed the opinion that the club, both as a group and as individuals, should take greater interest in civic affairs, attending commission meetings occasionally. Mr. Parry asserted that this city is on the verge of rapid expansion and that if a better community is to be evolved then Rotary and other clubs must take active parts in its growth, also pointing to three present deficiencies now existing here, the first being lack of street improvement, next, a lack of city beautification and lastly, the inadequacy of the present sewer disposal system.

F. Morse Cooke, second to take the floor, continued his remarks to the field of education. He urged the club to familiarize themselves with the work being done by the Board of Education here, as well as the state educational program. Mr. Cooke stated that while the local school problems appeared more important to the citizens of this city, right should not be lost of the fact that the state pays over 90 per cent of our school operating expense and that the programs of the two dovetail.

Mrs. Lee A. White took up the subject of Girl Scouting in her talk on Community Service. She questioned whether many members of the club were even familiar with the simple objectives of scouting for girls. She urged Rotarians to get acquainted with the aims and ideals of the organization, seeing the need of leaders and if the individual men of the group under-stand why and how the program was carried on for the best development of girls then they would be in a position to influence their wives, sisters and daughters to take part in such a worthy undertaking.

Mrs. White said that a group of 18 local women serve as a council, known as Girl Scouting here. As a member of that council she pointed out to the club some of the civic activities on girl scouts. Harold Webster was the last speaker. He explained that there was an ideal situation locally for community and social planning. He stressed five points, namely, that there should interest itself in children; cooperate with the police work here; furnish the health needs of the city; study recreational facilities here; Discuss and think over community service and social planning.

... and now it seems that our legislature is going to fail to utilize the greatest opportunity in Arkansas history to attract people from the entire nation to visit and admire our beautiful scenery and intrinsic hospitality.—Arkansas paper.

**PRODUCTION OF BEANS IN STATE COSTS \$30 PER ACRE**  
Labor, power and machinery costs account for more than two-fifths of the cost of production of beans in Michigan, according to a recent survey by K. T. Wright of the farm management department, Michigan State College, East Lansing. According to the study, published in Special Bulletin No. 276, now obtainable, these three costs amount to 42.7 per cent of the total. Use of land averaged 21.9 per acre, with manure and fertilizer averaging 15.2 per cent and seed 9.6 per cent. The average cost of production per acre is estimated at about \$30.

**CONGRESS WILL PROBE INTO WILDLIFE DAMAGE**  
Anxious at the lack of coordination between federal agencies spending hundreds of millions of relief dollars on projects without prior consultation of possible damage to valuable fish and game and fur resources, Congress has launched an inquiry into the situation. The Special House Committee on Conservation of Wildlife Resources has begun hearings at which officials of all identified federal bureaus have been summoned. Heads of national wildlife conservation organizations also have been invited to appear.

**First Baptist Church**  
Willita at Bates St.
