BETTER ... than the Old Oaken Bucket

• Can't you recall the deliciousness of water from some long remembered well . . . water that seemed so clear, and pure, and soft, its memory lingers?

Such water rarely occurs naturally. Most water, even if clean and bacteriologically safe, has hardness or some chemical content to spoil its taste. But no matter what your water supply may be, it can be conditioned . . . freed of all offending impurities. A simple Permutit Water Conditioning installation, attached to your household water supply, will give you delicious soft water throughout the house.

And conditioned water isn't only better for drinking . . . foods cooked in it taste better. It gets things cleaner with less soap and less scrubbing . . . makes clothes last longer. It's better for your skin and hair. So much luxury sounds expensive. But it really isn't. A Permutit installation will actually save enough to meet the payments under the FHA plan. Let us show you how. Write for free booklet.
