MOTION PICTURES SHOWN TO LIONS

Government by Law—
or by Edict?
By RAYMOND PITCAIRN
 National Chairman
 Sentinels of the Republic

Dominant among the demands of men who fought the Revolution was the right to a voice in the making of laws under which they were governed.

By their victory our fathers won that right. Jealously they guarded it—in both Federal and State constitutions. Under the system thus established, the enactment of law was reserved to men chosen by the people and responsive to their will. It is the traditional American system.

But there is another type of legislation—known as Administrative Law. It is a system of edicts and decrees, handed down by rulers to subject populations. In its enactment the people have no voice.

That's one reason why so many thousands of the people, not by their elected representatives, but by appointed chiefs of bureaus and commissions, are being governed. The voters had no choice and over the years they exercise no control.

In recent years those citizens who observed a constantly increasing number of examples of extravagance, arrogance and interference with individual rights on the part of Bureaucrats who assumed or to whom Congress delegated powers vested only in the people or their elected representatives.

Today they see the growing threat of Administrative Law supplanting unless checked, our entire American system of legislation—and with it our constitutional form of government.

Bureaucracy and democracy cannot continue to exist side by side. One or the other must yield. Whether or not we shall surrender government by the people to government by Bureaucrats is for us to decide.

As heirs of the patriots who waged a long and bitter war for the right to make their own laws, our decision should not be a difficult one.

MAPLE TO SPEAK AT CONVOCATION

New Students Will Be Taken Into Class, Says Director

Students, their families and friends, and all other members of the Community are invited to attend a convocation of the Birmingham Community College to be held in the Auditorium at Baldwin High School from 7 to 8 o'clock on Tuesday evening March 17, 1936. A 4:30 meeting at that time will be dismissed.

Mr. E. O. Maple, of Detroit, will speak on the subject, "Digging into the New Past," a survey of recent archeological discoveries told in language which the layman can understand.

Mr. Maple is a lecturer of wide repute. The Director feels that the Unit has been extremely fortunate in securing Mr. Maple for the first convocation. The Director says that the Washington meeting of 1935 was an hour of entertaining and instructive discussion will not be disappointed. The lecturer will tell in some detail of the many new discoveries concerning the life and times and characteristically human "new" documents of the ancient world.

It was announced that the one who desires still may enroll in classes at the Community College by seeing Mr. Brown, Room 203, Baldwin High School.

Classes meetings are held on the following subjects: Evaluation of Literature, Navigation, Public Speaking, Human Engineering, Dramatics, Play Production, Conversational Spanish, Photography, International Reading, and Standard Business, Sewing and Knitting.

ART INSTITUTE HAS HUBBARD AND CLEAVES

Father Bernard J. Hubbard, Alaska's famous "Glacier Priest," and Howard Cleaves, a geologist-adventurer, will be next Sunday afternoon and evening speakers at the Detroit Institute of Arts, at 3:30 and 7:30 p. m., respectively. Cleaves will show his exotic motion picture and speak on "My Sailboat Through the South Seas." Father Hubbard's new motion picture lecture, at 8:30 o'clock will be entitled "My Adventures in Alaska." Burton Holmes brings the finest and most colorful of his motion picture travelogues to the Detroit Institute of Arts at 8:30 o'clock, next Thursday evening, March 19, when he speaks on "What I Saw in Ethiopia." During his lecture the renowned traveler will show the picture of Ethiopian noblemen, personally given to him by his friend, Emperor Haile Selassie.

FHA SETS RIGID POLICY ON COLLECTION OF LOANS

A reasonable, yet rigid policy will be maintained by the Federal Housing Administration in respect to collection of claims on defaulted units under the Modernization Credit Plan, Raymond M. Foley, Michigan state director, announced.

"This procedure is well defined," Mr. Foley said, "under the plan. Under this plan default on an insured loan made by a lending institution, in violation of the claim with the Housing Administration for the insurance to be filed on the loan. Then the matter of collecting the defaulted obligation is turned over to the Housing Administration."

CHRIST CHURCH CANTORBOOK

Sunday March 15th, 1936

PLYMOUTH OPENS FIRST CAR SALES CLINIC IN DETROIT

The establishment of a nation-wide series of sales clinics in Detroit on March 2nd, was announced by the Plymouth Division of Chrysler Corporation. From a site of thousands of men in all walk of life who have wanted to own an auto, the Plymouth Division will select the most promising, giving them a free course in automobile salesmanship and an opportunity to determine their own career in America's booming industry. Present salesmen will also be enrolled in the clinics.

Starting At the Bottom

"When I was a boy," said a gray-haired physician, who spoke in a reminiscent mood, "I wanted to be a soldier, but my parents persuaded me to study medicine. "Oh, well," conceded his sympathetic neighbor, "such a life for a man with white-knuckled ambitions to content himself with a retail business."—Grit (Sydney, Australia).

Wanted—By Elmo

FRANK E. and SCOTT HAGAN I WATSON

Champion of the Oil Fields

ASK any Texas or Oklahoma oil drifter who's had both his business and his certain to answer "Why, Kemp Morgan, of course!" Ask him why and he will tell you it's because Kemp had unusual experiences than any other secker after "black gold" ever did.

For instance there was the time Kemp lost his best drill. He was working in soft ground but he noticed that the drill kept slowing down and slowing the farther it went down. Pretty soon it stopped completely. When Kemp tried to pull it out, it was stuck fast. Come to find out that he had hit an aluminum and the hole had slunk up around the drill so tight that even Kemp couldn't budge it.

Then there was the time a Texas "nigger" swooped down on Kemp's rig. But it didn't stop him—no sirree! He just kept on drilling, and brought in a 22-inch gauge. It was so cold that the oil froze as it spurted upward so there was a solid column of freight oil. Kemp just took the hole back to the surface in three-foot lengths and shipped it to the refinery on fat cars.

That was in Texas but Kemp had a funny experience once in Oklahoma. He drilled a well so deep that it tapped a rubber mine and he had to stop. Kemp had a gush pure rubber. He began to feel his breath on it to make it solid, cut it off in 11-foot lengths and shipped it to the refinery. When they made tire for trucks.

When the average drifter brings in a "duster," he moves his rig away from the hole. But not Kemp Morgan! He knew what a tough time the Kansas farmers had digging postholes in the summer when the ground was baked hard. So whenever he'd strike a dry hole, he'd just take his two hands, pull it up four feet and two inches at a time and saw it off. Then he'd ship a carload of these lengths across the state line where they are always found a market.
