WE ARE starting the year 1937, in a far better position to meet the requirements of home buyers, either new or existing homes, than ever before. This is the result of a careful study and an analysis made during 1936, of the situation in this particular section.

As an illustration we can offer you at this time, at least 15 new homes representing the work of eight different builders that we know are capable of building homes of character and guality as well as at a minimum.

These homes are all insulated and air conditioned, with oil heat and range from three hedrooms and bath with extra lavatory to five hedrooms and three baths; a price range of from \$6,300.00 to \$22,500.00.

All of these homes represent a savings of at least ten per cent, by reason of the fact that the labor and ma-terials were contracted for before present market prices went into effect. The locations and surroundings, the factors that really golyeon values, are ideal.

He you are at all, interested you will be well justified in skilling at our office and give us an opportunity to show you these properties and decide for yourself whether or not our claims are justified.
