Both lectures will be illustrated with her jungle motion pictures.

AUTUMN SNAPSHOTTING

Full landscapes add much to the artistic appeal of your photo album.

WE MAY sing of the flowers that bloom in the spring—'tis in— but a song cannot adequately describe the wonderful colorings that Mother Nature bestows upon the trees and shrubs in the fall. The woods are ablaze with color and new colorful fall flowers appear. Lakes, rivers, and the well known babbling brooks seem to reflect these bright colors.

Now, let's consider the type of film to use for fall colors. For example, suppose you are taking a picture of a bed of fall flowers—some deep reds or reds and others dark blue. Ordinary film, not the chrome type, would yield a print in which the brighter colored flowers would appear darker than the blue ones, though to the eye the orange and red flowers appeared lighter. It would not, in other words, give true color brightness values to black and white print. However, with what is known as panchromatic film the true tonal values in monochrome rendering will be obtained.

Renderings of color and cloud effects are further improved by the use of proper color filters with any type film, including the chrome and panchromatic.

A filter is a specially prepared disc of colored gelatin, between glass, which is slipped over the camera lens. Its function is to hold back certain rays of light and let others pass through. Although there are several kinds, I believe the best one who has never used a filter might choose

NO ONE could blame Robert Taylor if he decided to avoid New York City on his return from Europe. The reception his fans gave him was so frenzied a demonstration that several stalwart policemen are still nursing bruises.

It was bad enough at the railroad station, where screaming women broke through police lines and shoved each other to get a glimpse of Taylor to shake his hand. But that was nothing to what occurred on the Berengeris just as the ship was about to sail for New York. Girls in their teens simply swarmed all over the boat, climbing over railings, breaking through guard ropes, hiding themselves under life boats.

Sailing was delayed half an hour because a steward found two youngsters hiding under the bed in Taylor's stateroom, and it was thought wise to search the rest of the ship. Taylor was wearing a three-year-old battered brown felt hat, a brown sport coat, gray slacks and shirt, and sturdy brown sports shoes and looked as wholesome and modest as a provincial farmhand.

Before "Vogues of 1938" opened in New York, the professional dress modeling association gave a party for John Bennett, and gave her a plaque to commemorate the occasion. They say she has given new life to the fashion stores and modeling profession by appearing in this picture. Joan is the most modest and inconspicuous guest of honor you ever saw **John Bennett**, at a party. She drifted in unobtrusively, and in a quiet way she has many charming traits.

Columbia Pictures have entered the competition to see who can crowd the most radio, stage, and night club celebrities in one picture and at the moment it looks as if they are well ahead. Their "Freshman Follies" will include Gertrude Niesen, Jimmy Durante, Hal Le Roy, the sensational tap dancer, and Johnny Brown, who has grown so popular as bandmaster on that Tuesday night automobile hour.

Several of the radio stars around N. B. C. headquarters are dashing through scheduled and unscheduled radio spots these days and studying books on Chinese ceramics at odd moments. It is all the fault of Joe Gombing, commentator on the Monday night "Melody Revue." He recently sold eight rare vases for five thousand dollars after buying them for one hundred.

Ramon Novarro went to Reading and Harrisburg, Pennsylvania, a few days ago to attend the first showings of his Republic picture, "The Sheik Steps Out," and came back quite dazed and deeply touched by the warmth of his receptions. Crowds came from far and near to meet him at the station, and he was mobbed and then on to the theater. He appeared four times a day and sang encore after encore and still the audience shouted for more.

Smilin' Ed McConnell, radio's well loved singer, humorist and philosopher, returned to the air for his sixth consecutive year as dispenser of good cheer on Sunday afternoons. With the new series of thirty-minute pieces comes a change of outlet to N. B. C.'s Blue Network, giving Ed a coast-to-coast broadcast.

Ed McConnell coastbook. Geometric and impromptu Ed returned from "the little place in the North woods" after a summer of fishing, swimming and "jazz" around here. He is being supported in his half-hour broadcast by a distinguished group of musicians.

ODDS AND ENDS—Lupo is often to be pretty cautious after this when the invites guests to dinner. "F. C. Field" liked the cooking so well that he persuaded the cook to come to work for him. . . . *Hollide Show, the C. B. S. soprano, has been in New York for six months and has never been in a night club.* . . . *Say, did you know?* . . . *Martone Delirich* is having a lot of peasant folk music. . . . *Bludapest* to bring home to her Hollywood friends. . . . *The most widely quoted joke* in the music business concerns the wild leopard which is being tamed to act with Katherine Hepburn in "Bringing Up Baby." . . . *Ernest Jones says,* "But who is going to tame Katin so she won't frighten the leopard?" . . . *Eddie Cantor* went to London and impersonates a harem dancer in a sequence of "Ali Baba Goes to Town" and his daughters are enjoying it immensely. They pursue him calling him "The Sultan."

Lettuce, celery, mint and parsley have made a reputation. Lettuce is eaten to the very last leaf; there are many ways in which to serve it.

Celery is the most versatile of them all, its varied uses enable the housekeeper to make use of the coarse stalks as well as the crisp.

Mint has a distinct appeal to the appetite and appears in the form of leaves, essence and oil.
