

## CITIZENS GIVE APPROVAL TO DISPOSAL PLAN

(Continued from Page One)  
uses \$10 worth of water during winter months, and \$20 during summer months, the City will add \$10 for these revenue bonds, or 50 per cent of the whole amount based upon the winter rate. The cost for the general obligation bonds will amount to approximately \$1.20 per thousand.

"The \$143,000 in general bonds is for the installation of trunk line sewers from various sections of the community to the proposed disposal plant," continued Mayor Marta. "This also includes a sewage pumping station, to boost the flow from the corner of East Main and Adams streets."

west side of town, where the natural gravity fall will then handle the sewage. Your City Commission has gone into the financial arrangements thoroughly, and deem the suggested method of payment as equitable to all concerned.

"We all know that, in these days, no community is going 'hog-wild' on the matter of increasing its public debt. And Birmingham doesn't propose to expend money unless sound public policy demands it. The wise expenditure of funds, however, is

Birmingham's population is increasing constantly, and so is its property valuation. Birmingham is proud of its growth as a fine residential community.

"We must guard the health of our citizens. With their cooperation, we expect to have the best

plant, operating within a year. In the meantime the State will not press us, since it knows we are solving the problem. Unless we do solve it, the State can prevent us from emptying sewage into the River Rouge, and we know that such procedure would be harmful

A generous round of applause greeted the Commission at the conclusion of the meeting, which lasted an hour and a half.
