YOU'D BE SAFER WITH HUDSON'S EXCLUSIVE DOUBLE-SAFE BRAKES

WHAT WOULD HAPPEN TO YOU IF A TIRE BLEW OUT AT 60?
WHY? Because this revolutionary mechanical invention (patent applied for) automatically helps to keep wheels on their course—on rough roads, in heavy side winds, even when a tire blows.

WHAT WOULD HAPPEN TO YOU IF HYDRAULICS SUDDENLY FAILED?
WHY? Because, even if hydraulics should suddenly fail through accident or service neglect, the driver of a Hudson just pushes farther on the same foot pedal and STOPS. Thanks to Hudson's exclusive Double-Safe Brakes—two braking systems (finest Bendix Hydraulics and separate reserve mechanical system) working automatically from the same foot pedal.
