## "Autobiography of an Attitude"

RECENTLY we called on some friends of ours. We had been over to see them a short while ago—but this time, as we entered their well-appointed living room, there was something different about it!

It seemed to be a room filled with more cheerfulness. Looking to see what might have been changed, we discovered the presence of two new lamps. One, on the table, was higher than the one which was previously there, and it cast an indirect light. The other, somewhat smaller, was most appropriate in that living room. All of which brought to mind George Jean Nathan's "Autobiography of an Attitude," wherein he wrote of lamp light. If you have never read it, we give it to you here, with all the eloquence of one who captured the beauty and the effect of "just the right lamp light."

Writes Mr. Nathan: "ONE of the most beautiful of all things is a beautiful lamp. Nothing in this world, save it be music, can so soothe and set adream the mood of mortal man. The past and all the present and some of the future are encompassed in its soft persuasive glow. It is the symbol of love, of home, of wistful vagrant fancy, of all the hopes and despairs of one's life on earth. God made the sun, the moon and stars; but man, His child, out of necessity, made for himself the lamp light as a beacon and a haven for the innermost secrets of his heart of hearts..."
