These California Blondes

By Schuyler L. Marshall, of the Clinton County (Mich.) Republican-News. We got to talking—Mother 'n me—about the youngsters we see on the streets, in the stores and around the places we have been lately.

finger-fouling manicurist and sat down. She put one of his paddies in a little dish of water and started tinkering with the nails on the other fist. The gal soon got to rolling her misbegotten eyes and the darn fool fell for it. We sat there for 20 minutes and had to listen to a lot of twaddle that would physic a snip.

We are guilty of most of the sins of the average male... and likely vulnerable to most of the frailties of the human race. Yet, we have never yet succumbed to the ministrations of a female fingernail polisher.

Getting back to that talk Mother 'n me had... the yield of artificial blondes, tooth-brers, is another here in Los Angeles than any place we've ever struck. You ought to see 'em, boys. You might think it would be monotonous. Not so! No sire! There are dozens of varieties of blondes. Some are ash blondes, some look like albinos.

Back of it all, we suspect, is a desire on the part of these little wigdiggers to look like the movie gals whom they occasionally see. The girls who work for the cinema producers, we are told, have to dye their faces with a brown-colored paste so as to photograph well. We saw Mary Livingston (Mrs. Jack Benny) the other day and she looked as if she had the jaundice. Probably the shop gals and the barber shop finger-blacksmiths hope to be mistaken for some one of the glamour gals of the cinema.

Congress Column

Lights, camera, and plenty of action were the keynote of the 79th annual meeting Monday. The reason—The Congress was sitting for its picture in "The Picture."
