Inspiration Clarance H. Hamilton

We all need inspiration to make us improve, think harder and be more efficient. These messages to men and women who have overcome difficulties are intended as an aid to your success and happiness.

DO NOT PERMIT FEAR TO HOLD YOU BACK
"Never be afraid of people!" That is the advice of A. P. Giannini, chairman of the Board, Bank of America and one of the nation's foremost financial leaders.

"This admonition applies to the individual as well as to the business, industrial or financial institution desirous of improving its relations with the public."

"It presupposes sincerity of purposes and honesty of motive. Just as a corporation with a clear conscience should never fear to present its case to those it serves—the people at large—so the young man or woman should hold no fears for the opinions of associates or employer, so long as he or she is governed by sincerity and honesty."

"In our own organization we expect those who serve us to do their own thinking. We could not place educative responsibilities in the hands of men and women who allowed a fear of others to influence their judgment. Such fear smothered confidence, prevents the development of latent capabilities, and renders the victim useless for anything but a position of servility."

"To anyone in search of success I would say: Build a self-respect on the foundation of sincerity, honesty and a desire to be of service; always remembering that to grow with an institution you must help that institution to grow."

The Bank of America has become one of the world's largest and most influential financial institutions under the administration of Mr. Giannini. From a humble beginning, he rose to the top by intelligent thinking, hard work and a genuine willingness to serve that has been made the widely recognized policy of the organization he heads.
