Four Bald Eagle Nests Discovered

TRAVERSE CITY—Bald eagles nesting in four places within a 15-mile area in the Grand Traverse Bay region, have been seen from the air recently by Walter E. Hastings, conservation department photographer, flying with Col. Floyd E. Evans, state board of aeronautics director.

Three nests were occupied. The fourth is lined and ready for occupancy. Hastings submits the nature note with the additional information that almost never are eagles' nests found closer than 20 miles from each other. He adds that reports have been supplied him of 67 similar nests within Michigan's borders and that he has located, in all some dozen of them.
