More Fascism For America?

Showing How Regimentation Starts Slowly But Surely

By DR. V. O. WATTS

Fascism, or Nazism, means dictation in business as well as in politics.

It begins with dictated prices. This dictation covers not merely prices of commodities but also prices of services—wages, salaries and profits. It extends to rents, dividend rates and interest. It starts with a few commodities, and spreads like a dry rot over more and more trades and industries.

In order to enforce the dictated prices, dictated wages and dictated profits it next becomes necessary to dictate volume of output and methods of production. The next step is rationing of consumers.

Political dictation is necessary to make the economic dictation work. Only a highly centralized and powerful government can keep business regimented. Only a dictatorial government can suppress criticism and keep things moving. This knee-step society does not develop overnight. It cannot be thrust upon an unwilling people by a sudden revolution. It develops step by step, supported by first one group and then another. This was the case in Italy, Germany and

The eagerness of the profit-seeking enterprise would be replaced by the buck-passing apathy of the confirmed bureaucrat.

Such fascist moves have no more to recommend them in the United States than in Germany. They do not promote industrial efficiency or social equality.

It is America's greatest asset in world competition is now as ever the enterprise and initiative of a free people.

To protect this freedom for each of us must become a first responsibility for all of us.
