A Slight Error

By some error (probably mine) an incorrect front B.S. last week, instead of B-12. Guess the 8 and 12 keys on this typewriter are mixed up, my fingers. Not that B.S. doesn't deserve some big things said about it, indeed, we have it on the very best of authority that all the rest of the troops in town will have to do when B.S. really begins, again.

If your troop has not already received notice of the events to take place at the next Indoor Rally, it will surely have it by the next meeting. And right then is a good time to start practicing. Drill, team of eight; pyramid building, team of ten; signaling, team of four for both male and semaphores; fire by friction, two boys; first aid, team of six and patient; knot tying, eight knots and eight Scouts. Then there is a surprise event that requires only one quick-thinking, intelligent boy per troop.

Rotarians Hear Detroit Architect

The function and responsibility of the modern architect was the subject of a talk given to Birmingham Rotarians Monday night at the Community House by B. V. Gambler, Detroit architect. Mr. Gambler, who was introduced by Rotarian J. Robert H. Swanson, local architect, traced the story of his profession from the earliest days of mankind, pointing out that architecture is a primal profession because in the original form it provided mankind with shelter. He explained the many steps necessary for architects to handle in designing and supervising modern construction, stating that by virtue of the many factors entering into home or industrial building construction, an architect must in truth know many things. "While the architect always seeks safety and economy in handling work for a client, he must also have an eye to beauty, to the end that human habitation upon earth may be as pleasing to the best desires of people," said Mr. Gambler.

Why lug the Drum when you can twirl the Baton?

*Above is the Buick SPECIAL 4-door touring sedan \$895**

YOU never yet saw a hand come down the street without someone out in front setting the tempo, while someone back in the crowd obediently thumped in time.

So you'll get what we mean when we say, why drive a car that's along just for the march—when you can pilot a Buick and show the others the way?

Maybe someday the others will have engines like velvet because they're electrically balanced after assembly; but Buick has them now.

Maybe tomorrow they will have coil springs all around that never need greasing—but Buick has them today.

Maybe sometime you'll get the front-hinged doors, five-foot front seat room and Foamtex cushions of the SUPER—maybe you'll get direction signals with automatic cut-off as standard equipment—but you can get those on the Buick you buy this year.

Maybe someday you'll get a car as long as Buick for the money, or with a frame as heavy without paying more.

But why take a chance on those maybes when this honey's here, ready for you to take over right now?

So drop in on your Buick dealer. Drop in to talk facts and figures, or drop in to see what next year's cars will try to look like.

But drop in! Soon!

"Best buy's Buick!"
