

Junior Red Cross Unit Organized In City Schools

With the approval and cooperation of Supt. Howard D. Crull and the principals of the Birmingham Schools, a Junior Red Cross Chapter has been organized in the schools with Mrs. Harold Strong as chairman.

The members make scrap books, toys or clothing for sick and needy children; provide favors; furniture, folk books, entertainment, etc. for war veterans; cooperate in community projects; exchange international and inter-sectional correspondence; take courses in first aid, home hygiene, etc.

Each elementary room enrolled received a copy of Junior Red Cross News monthly; high schools receive Junior Red Cross Journal. There is an enrollment fee of 50 cents for each elementary room, and \$1 for each 100 high school students.

Birmingham schools have responded splendidly in joining the Junior Red Cross, it was announced. Barham with 16 rooms, and Quenton with 10 are enrolled 100 per cent. Adams has already enrolled 14 and expects to become 100 per cent by the end of the term. Pierce has one room enrolled and Holy Name three.

Stolen Car Recovered The car of Hon. Gaskill, Walnut Lake, stolen at 3:30 p. m. Saturday at Bonnet's garage, was recovered Monday morning parked on Park avenue. It was not damaged, police said.

Questions and Answers

Q. We have just replastered a room in our house and have been told that the plaster should be treated before painting. Why should this be done, and what preparation should be used? A. New plaster which is to receive an oil-base type of paint should be treated for the purpose of neutralizing any free lime which might be present in the plaster. A solution of one part of hydrochloric acid to ten parts of water is recommended for this purpose. However, if you plan to use a certain paint or one of the new emulsion type paints, no preliminary coating will be necessary.

Q. How can flooring or floor coverings be used to change the appearance of a room? A. The use of self-stick flooring, creating strong parallels the length of the room, will make the room appear longer. Running the parallels the width of the room will make it seem wider. General custom, however, is to run the flooring the width of the room. Small tiles used for floors create the impression that the room is larger than when large tile size is used. Color of the floor will also effect the size appearance of the room. If walls and floors are harmonious and of about the same value, the room will seem larger.

Lists 17 Ways To Guard Roses

It takes a Spartan to grow roses in Michigan. In a new publication of insect pests a list of 17 has been compiled by a few farmers, though fortunately only a few are important.

There really are five serious pests. Top rating goes to the aphid which can be sprayed with nicotine sulphate, one ounce of 40 per cent solution of water plus one ounce of soap and applied as soon as mixed.

Next in rating probably is the rose beetle or rose chaffer feeding on flowers and foliage. Protection of rose leaves on this pest can be made with cloth tents, or flowers can be protected with a purified pyrethrum dust.

ROSE SLUGS PROBABLY COME next in importance. These skittering flatish or cylinder-shaped leaves, buds or twigs are eaten. Dusted or sprayed are recommended by Professor McDaniel.

ROSE BARK BEETLES ARE ALSO a pest. These are small, oval, reddish-brown insects with long legs. They feed on the bark of the rose.

ROSE BARK BEETLES ARE ALSO a pest. These are small, oval, reddish-brown insects with long legs. They feed on the bark of the rose.

Gardeners' Corner

Change of Season The surging is going up on the second important garden picture. The tulips and only blooming plants are faded and the scene is even one to find peonies and their companions—saxifrage and heppes, violets, and pink.
