TELEPHONE INSTALLATIONS MUST BE LIMITED

can no longer be met, the blame lies with telephone service. the enemies of our country.

To win this war, we must conserve every

possible pound of vital materials.

Critical shortages have caused the War Production Board to issue an order strictly limiting the use of those scarce materials

IF you find that certain telephone requests by the telephone companies in expanding

The War Production Board estimates that this conservation program will save annually about 35,500 tons of lead, 29,000 tons of iron and steel, 29,500 tons of copper and large amounts of zinc, crude rubber, magnesium and other strategic materials

HOW THE ORDER MAY AFFECT YOU

- 1. PARTY LINES, only, can be installed in many cases.
- 2. EXTENSION TELEPHONES cannot be installed in residences except where needed by those responsible for public health, welfare or security.
- 3. TELEPHONES of wall or desk (upright) types cannot be changed to
- 4. MANUAL TELEPHONE SWITCHBOARDS may not be changed to dial

The steps taken do not mean that the basic

to provide the best service possible, and quality of your telephone service will be we look forward to the day when we can urtailed. They simply remove some of the de luxe trimmings. We shall continue for the duration, uer needs come first.

Enough copper for 3,816 BOMBERS

The Detroit Edison Company last year

SALVAGE of critical inaterials-doubly important in our business for the last twenty years. In striving to furnish the best possible service at the lowest cost, we have constantly sought new methods of achieving more efficient operation. The conomies we have made— through salvage and in other ways—have been passed on to our customers in the form of lower electric rates.

Aluminum is not the only metal needed in the construction of lighting planes. One type of homber requires more than two miles of copper wire to "keep it flying." Another needs 500 pounds of copper per plane ... a quarter of a ton of the metal. Last year The Detroit Edson Company's Salvage Division reclaimed 1,908.395 rounds of copper—enough for 3,816 hombers. The Company also salvaged 1,358,193 pounds of lead ... and various other metals such as serap iron, aluminum, brass, zinc, etc. inum, brass, zinc, etc.

During the goming months. Detroit Edison service will undoubtedly be restricted in several ways, because so much of it will be needed by the government for the war effort. With rubber tires, cars, etc., being rationed, war cutoff, with runner tires, cars, etc, being rationed, we are adjusting our work to meet wardine conditions. Because we have no priority rating on tires for delivery trucks or the ordinary light cars with which we do not of our business, you may be inconvenienced to a cectain extent. But emergency service—storm, wires down, etc.—will be handled as promptly as ever. On other types of service—where you may have to wait a little longer—we ask your patience.

THE DETROIT EDISON COMPANY
