Knocking on Wood

with JOHN H. HARWOOD

ON DRAFTING MANPOWER

There is talk of "drafting manpower" for war purposes to ensure that the military and productive needs are ade-quately met. The idea is still too embryonic for you or me to know just what the High Command in Washington has in mind, but there are some.

Wages of A preacher in England presents this heart-searching series of contrasts, which we in America do well to heed.

We have been a pleasure-loving people, dishonoring God's day: picnicking and bathing.

We have preferred.

"We have preferred motor travel to church going. Now there is a shortage of motor fuel.

motor fuel.

"We have ignored the ringing of the church bells calling us to worship. Now the Bells cannot ring except to warn of invasion.

"We have left the churches half empty when the should have been filled with worshipers. Now they are in ruin.

"We would not listen to the way of peace. Now we are forced to listen to the way of war.

war.

"The money we would not give to the Lord's work—now is taken from us in taxes and higher prices.

and higher prices.
"The food for which we forgot to return thanks—now is unobminable.
"The service, we refused to give to Godmow is conscripted for the country.
"Lives we refused to live under God's control—now, are under the nation's control.
"Nights we would not spend in 'watching unto prayer'—now are spent in anxious airraid precautions.
"The evils of modernism we would not fight. Now, see what Germany, the seat of this teaching, has produced!"

Advice to the women, which comes from Mrs. Edsin J. Strong, president of a Parent-Teacher Association on the Pacific Goast: Urging women with families not to spend too much of their time rushing about to cancer classes, and such special activities, Mrs. Strong reminds them that "there is something more important in your family."

This is sound sense. There are enough women in the nation to take care of all probable war needs without disrupting fam-ity life. The woman who takes care of her children, and gives a, bit of attention to the 'old man' and his problems, is rendering as patriotic service as any other person in the nation.

A NOTED SUSMOLOGIST STATES that some time after 1943 Japan will suffer a great earthquake. He bases his statement on the fact that every 20 or 30 years carthquiskes hit Nippon, the last one being in 1923, Well, let's hope the new one comes simultaneously with the inevitable bombardment of Japan by heavy guns from the Allies.

K. B. Otsox, of Hawthorne road, Birmingham, last week amounced his candidacy for City Commission. Mr. Olson has an intimate knowledge of the operation of government, and is an aggressive proponent for economy in the use of the taxpayers money. If he were elected this spring we'll wager that he would save—or be shouted down in the 'process-plenty of this town's precious funds.

Vast Production
Ahead

The industrial age is made up of man mass production depends upon the manufacture of these important units before the production line begins to turn out the desired units.

units.

In connection with the mammoth industrial effort now being organized in the United States, Burnham Finney, editor of The American Machinist, points out that machine tools will be turned out in the United States at the rate of more than 1290 units at day in 1942.

rate of more than 1200 units a day in 1942. In a noirmal year, machine tool builders enjoyed a business of around \$100,000,000 but gradually the output has increased. In 1940, the industry delivered \$442,000,000 worth of machine tools and, in 1941, shipments soared to more than \$750,000,000 worth.

to more than 18,500,0000 worth.

In 1942, according to Mr. Finney, more than \$1,000,000,000 worth of machine tools will be produced. This means that mass production methods will be expanded to additional industrial plants and that the production of necessary ordnance, tanks, planes, ships and other material of war will reach almost unimaginable proportions by 1943.

TRANSPORTATION SERVICE between Detroit and Pouttae is of utmost importance, as more and more motorists seek public convexances. This means that both the Grand Trunk railroad and the Suburban Greyhound officials have thrust upon them a larger share of war emergency responsibility.

"MEPING FIT" classes will start in the Bald-with high school gymnasium this week for men and somen who desire to engage in various athletic activities. It's a fine idea, and may provide substitute exercises for shoveling snow, chopping wood, digging in the garden, etc.
