

\$70 MILLION SAVED

..... ON A GROCERY BILL!

SEVENTY MILLION DOLLARS! This vast sum would go a long way toward filling the wants of countless American families! And it probably did—for last year, more than that amount was saved for customers of A&P Super Markets... because the food they bought would have cost that much more if these stores operated on A&P's cost rate of a few years ago. But A&P has steadily reduced its cost of selling food through new efficiencies—bringing amazing savings to its customers. Get the real significance of these savings. Millions of families not only saved by changing to A&P Super Markets from other food stores... but they made additional savings as A&P found new ways to do business at less expense. A&P carries on relentless war on needless expense in distributing foods. And each time it succeeds in saving money, you share in the savings.
