Tighten Restrictions On Grade 3 Tires

Tightening of the restrictions on the issuance of Grade 3 (used) tires brought warning this week from the Birmingham rationing board that all drivers must be more careful of their tires.

Many drivers run their tires for retreading, or otherwise injure them, and under the new restrictions a driver may secure a recap, but sometimes tires are "out of luck" if he or she runs a tire.

According to a message received here from William Jeffrey rubber car, the tire situation at the present time is "not good" and will not improve until synthetic plants attain full production.
