The program will be presented featuring the choral ensemble under the direction of Gertrude Heinz Grove. Neva Fenskemper is violin soloist and Grace W. Williams is pianist. Mrs. Edgar L. Bailey is chairman of the day.

Garden Club Hears Three Speakers
Mrs. Stanley E. Saunders conducted the meeting of the Birmingham branch of the Women's National Farm and Garden Association Monday afternoon in the Community House. The program was sponsored by the victory garden plans and the wide acceptance of the victory garden idea in the community was presented by Mrs. Saunders in her address. The speakers were Mrs. Marc T. Patten, Robert K. McClellan, and Harold F. Klein, and then set up two round-table discussion groups.

Discusses Herbs
Those interested in the growing and use of herbs listened to Mrs. Patten in the Richmond Hotel last night. She advised the use of herbs in various dishes and unusual cuts of meats available in markets today. She recommended frequent use of water-cress, especially, planted in small pots in the kitchen and used as garnish.

She advised the use of basil with tomatoes in sauce, soups, and pastas, and thyme, all easily grown from seed. "Start herbs early in pots in the house, covering with snow which keeps plants moist," she said, and advised the use of pea moss to hold the moisture.

"Care should always be taken in the use of herbs to keep amounts down to a minimum, giving suggestions of flavor rather than highly pronounced flavor of any one or combined herbs," Mrs. Patten added. She stated that summer savory and sage are easily grown and dried at home. Rosemary is another plant giving distinctive flavor, she stated.

Advices on Victory Gardens
Mrs. Klein advised that victory gardens be planted in accordance with family needs. "Not too large, but about 1,000 square feet for an ordinary garden. Make it look attractive as well as productive," she said. She advised successive planting and that, especially, be planted in small pots about two weeks apart. "Planting of corn may follow. When peas stop blossoming, they are through bearing, while beans, cut back, may bear new pods," she added.

Describes Use of Fertilizers
Mr. McClellan pointed out that pea beans bear heavier than bush beans but are more difficult to grow. He advised the use of fertilizer in plots which have not formerly been used for gardening, pointing out that the growth of weeds and grasses naturally lowers their fertility. He advised more fertilizer for sandy soil than for clay.

Mr. McClellan talked on insecticides as colored slides were shown of garden and orchard pests and their vast destruction of plants and fruits. He discussed new effective sprays on the market, as substitutes for those formerly used, and how harmful because of certain materials being put to use in defense.

Birmingham High School furnished the projector while the screen was loaned by Gann A. Florio.

Mrs. Robert D. Lynd was chairman of the tea which followed with Mrs. S. O. Wylie Bell and Mrs. Richard T. Chissus assisting her. Mrs. H. E. Chapel and Mrs. Henry Beachler presided at the tea table which was centered with white stock, blue iris, and daffodils.

"No Need to Fear Russia" Noted Correspondent Says

Miss Evelyn Buchanan's report to the Leelanau Stove's Town Hall lecture, Saturday evening, drew the greatest enthusiasm for the International Relations class Tuesday morning at the Community House.

As the air was charged with the morning's account of Admiral William J. Standley's observations, it seems that again Mr. Stowe was on the right spot at the right time.

Miss Buchanan, who is in almost every major theatre of war since the invasion of Norway. This time, to give an unforgettable reply to the Admiral.

Mr. Stowe, in his lecture entitled "What I Saw in Russia," stated that Stalingrad alone spared the lives of 1,000,000 American boys and at least another 1,000,000 British by preventing Germany from getting the oil she was after.

In Leningrad, one half of the 3,000,000 population has died of starvation. There is no medicine of any kind for civilians, no shoes, no windows. They have lost 7,000,000 soldiers—our complete army reported.

The miracle of Russian resistance can be broken down into factors. Transcending the well-known factors of dictatorship, speedy decision, secrecy, and wartime economy, he considers, is the miracle of the women of Russia. The work of women and children has fed 180,000,000 people. The women operate all anti-aircraft batteries and have taken over the police forces. The only fuel for the city of Moscow with temperatures from 14 to 40 below was wood—20,000,000 cords of it cut by the women of Moscow.

Other factors in their unbelievable resistance are the unity of the people under their efficient leadership which has resulted in no uprisings from the Marxist sympathizers, the Ukraine, or any other place. Also, there is no graft in the government and the people know it.

Need Not Fear Russia
Questioned about fears of Russia after the war, he said, "There's no need to fear Russia unless we allow ourselves to be talked into a break now." They have too much to do rebuilding factories, dams, railroads and housing their 20,000,000 refugees who are now living in churches, movie houses, and railroad depots.
