### HELP YOUR GAS RANGE TO CARRY ON TREAT IT WITH CARE... KEEP IT IN GOOD REPAIR... IT WILL LAST LONGER

The modern gas range is one of those time and labor savers that is hard to replace today. And because it seldom, if ever, requires repairs it is apt to be overlooked. Here are a few hints on the care of the gas range that will save time, money and disappointment.

### SIX WAYS TO LENGTHEN THE LIFE OF YOUR RANGE

1. Clean ports (small holes) of burners with wire or stiff brush. Wipe off burners with damp cloth. If necessary, wash with warm water. Use washing soda only with old type star burners.
2. Care should be taken to dry the burners thoroughly before putting them back on the range.
3. Do not clog oven flue outlet. It causes inefficient oven operation.
4. Don't bang oven doors or load them with heavy utensils.
5. Wipe off spilled foods. Keep all parts clean. Wash burner pan and grill after each use.
6. If anything goes seriously wrong, call your dealer.
