DETROIT EDISON LINES

Timely items of interest and value helpful suggestions about cooking, lighting and appliances.

SAVE ELECTRICITY

Electricity requires coal for its manufacture. Thousands of tons are burned every day in Detroit Edison power plants. Every time you turn on an electric switch in your home, or plug in an electric appliance, you are actually burning coal. Coal that has been transported by boat and by rail—coal that represents vital production and manpower. Coal is a critical war material. So is electricity, and it should not be wasted. Save electricity whenever you can, as much as you can. Help save urgently needed fuel.

29 MILLION TONS!

As a part of the nationwide National Fuel Efficiency Program to save 29 million tons of coal (or their equivalent) this winter, 1,800 business establishments—large and small—in southeastern Michigan have enrolled to put into effect fuel savings for this year's heating season. Coal rationing can be avoided if everybody helps by saving fuel!

GILDING THE HOT DOG

Meet the humble hot dog in a glorified dish, presented by our Home Service Department:

Crown Roast of Frankfurters
Arrange frankfurters to form a crown on a shallow baking pan. Place stuffing in center and tie bacon strips around frankfurters to hold them in place.

Sweet Potato Stuffing
Add one cup dried celery, one tablespoon minced onion, two tablespoons melted butter and 1/2 teaspoon salt to three cups mashed sweet potatoes.

CONVERSION

The Dime and Ford Buildings in downtown Detroit have operated their own power plant for 31 years—and now have changed over to using Edison electricity and steam. 1,300 tons of coal and 120,000 gallons of fuel oil will thereby be saved for the war, it is estimated. Practically all the big buildings in downtown Detroit—one hundred million dollars' worth of them—operate without furnaces or boilers. For light, heat and power, they depend wholly on Edison service.

You save coal, transportation and manpower when you save electricity.
