

Legion Lays Plans For Its Fall Meetings

The executive board of Charles Edwards Post, No. 14 American Legion, met in the Legion Home last Friday evening when plans were discussed at that time for a fall campaign on membership and tentative round of entertainment and recreational gatherings discussed.

Notices were gotten out for the first regular meeting of the post for the current year. It was hoped by the commander and other officers that a good number of those members who have been too busy to attend can squeeze in enough time to be there for this first meeting of the year.

The commander, with the aid of the executive board, promised to streamline the meeting to accomplish the most in the shortest time possible.

FIRE INSPECTION RECORDS

Keep those fire inspection records until you get your new mimeographed form along with your new "A" book, OPA says. Since discontinuance of periodic fire inspection last April, fire inspection records have been kept primarily as a record of gasoline rationing each automobile, and will no longer be necessary when the new form is issued. Outside the East Coast, will go into use September 22, and in the 17 East Coast States, Feb. 9.

Lunch At School Means Much Work In Most Sections

All the problems that come up when school starts aren't in the books. One of the biggest ones doesn't have anything to do with classes. It's the problem that comes up when the noon bell rings and the children pour out of school rooms, ready for lunch.

True, many can go home, but there are others who because home is too far away or who because their mothers are working, must face that noon recess with cold lunch, often packed in a hurry and more often lacking in foods which make for an alert pupil during the afternoon.

This was the problem the Congress and the president were considering when they approved the \$30,000,000 school lunch bill. By this action they assured thousands of schools in the nation of federal aid in their community school lunch programs, assured millions of children a hot nourishing appetizing lunch.

When you look closer though you can see that something bigger was going on. The bill not only puts down the groundwork for better feeding of the nation's children, but it encourages increased

consumption of food in temperance abundance. It is another step in the direction of aiding farmers in development of better domestic markets for their products.

In the Beginning

When the program started out in 1939 its main purpose was to provide an outlet for surplus agricultural commodities which were a glut on the market in most of the nation's large food producing areas.

Now at the beginning of its tenth year the program seems to have had its face lifted. Increasing stress has been put on nutritional advantages of the program.

Any U. S. school, public or private, of high school level or under, operating on a non-profit basis is eligible to apply for the program. In schools where it operates, a local sponsor takes most of the responsibility for working out the details of the program. This is usually the local school board aided by a parent-teacher group or some civic, non-profit organization such as Kiwanis, Lions, Rotary, Junior League or American Legion.

The local sponsor buys, stores, prepares and serves the food, cooperating with the government by using abundant foods and their rounding out the menus with other foods. War Food Administration (the Government's representative in the program) reimburses the local sponsor for part of the cost, depending upon the financial need of the school and the type of lunch served.

Type A lunch, providing one-third to one-half of a child's daily requirements, contains at least one-half pint of milk, meat, poultry, cheese, fish, eggs, dry peas, beans, soybeans or peanut butter, vegetable and/or fruit; whole grain enriched bread and butter or fortified oleomargarine. WFA pays up to 9 cents if this lunch is served.

Type B is about the same as A but portions are smaller and should be supplemented by foods brought from home. WFA pays up to 6 cents for each of these lunches.

Type C is one-half pint of milk, KROGO Vegetable Shortening, Mi-Choice Brand Vitamin Enriched MARGARINE.

For frying, cooking LARD. In 2-lb. Packages No. 2 GREEN PEAS.

Kroger's Puffed Red SOUR CHERRIES. Kroger's Vitamin Filled GRAPEFRUIT JUICE.

EDISON LINES. Timely items concerning your electric service, suggestions about cooking, lighting and appliances, and many other things of interest and value will appear from time to time in "Edison Lines". Make "Edison Lines" a reading habit!

BANISHING JITTERBUGS. Jitterbugs may claim the center of attention on the dance floor, but an Edison power house is no place for large, heavy equipment to start doing a jig. When a huge fan mounted a hundred feet above the ground, or a turbo-generator weighing 500 tons, turns jitterbug, something has to be done about it.

MEAT-POINT STRETCHER. Our Home Service Department offers this modern version of an old Scotch recipe. It is easy to eat the ration book.

COOK ONIONS IN BUTTER UNTIL SOFT. Add ground beef and cook until barely brown; then add condensed tomato soup. Sprinkle with salt and pepper and mix well. Line a 9-inch pie plate with short pastry, rolled 1/4-inch thick. Moisten edges of crust with cold water. Fill pie shell with meat mixture. Prick top crust and place over pie; brush with melted butter and bake in moderate oven, 375 F., for one hour, or bake in a hot oven, 450 F., for 15 minutes, and then decrease heat to 350 F. and bake 15 minutes longer. Serves six.

SLIP COVERS FOR LAMP SHADES. If you have a solid lamp shade and cannot obtain a new shade, try making a "slip cover" using patterned paper of a light color, or cotton cloth (gingham, percale, chambray). Lay the material on the lamp shade, and mark the shape to be cut out. Then sew or paste the edges together, and finish with a simple edging or trimming. Slip the new shade over the old shade.

DUST STEALS LIGHT. Dust and dirt collecting on lamp bulbs, reflector bowls and fixtures will often obscure as much as 50 per cent of the light. To get all the light you pay for, clean lamp bulbs and fixtures frequently, also floor and table lamps. Wipe lamp bulbs and bowls with a damp cloth, and be sure lamp bulbs are dry before screwing back in socket. A soft brush can be used for dusting lamp shades.

The Detroit Edison Co.
