Open Its Pall Season With Meeting Sept. 11

To Customers of the

Detroit Edison Company

It is important for you to know why we are appealing from the Michigan Public Service Commission's recent order that Detroit Edison refund \$10,450,000 to its customers*

Attempts are being made to impose added takes and other burdens on the Company and to divert Detroit Edison war taxes from the U. S. Governments

1. BY MEANS OF AN "EXCISE TAX". The City of Retroit passed an "Excise Tax" ordinance, designed—as the City's representatives stated—to divert Detroit Edison war taxes from the U.S. Government to the City Treasury. The "Excise Tax" requires The Detroit Edison Company to turn over to the City of Detroit up to one-fifth of all gross income received from Detroit customers.

2. BY MEANS OF A RATE CUT OR REFUND. When in 1942 the City of Detroit asked the Michigan Public Service Commission to order a cut in rates, the plea was denied and our rates were held to be reasonable. After appeal and rehearing, the Commission has now decided that a refund should be made to customers, from money that would otherwise be paid to the Federal Government in war taxes, So then . . . despite Detroit Edison's acknowledged fair rates . . . the Commission ordered a refund to enstomers, ignoring the excise tax described above. This was done despite the fact that since the start of World War II, we have made reductions fact that since the start of world war 11, we have made reconstroin in rates to residence and commercial customers. The general cost of living has increased by 29 pericent; food by 38 per cent. Wages and the price of coal have increased, all bringing about a heavy increase in our own costs. But while prices have risen our rates generally have not.

These actions would take about two million dollars a year more than we would otherwise pay the Federal Government in war taxes.

1. someone . The same ten million dollars is being claimed in three places at once!

Obviously, we cannot pay it to the Federal Government in war taxes and to the City of Detroit in excise taxes and to our customers in the form of

Only the courts can decide. Our customers should know that we will pay these war taxes or the refund when we know to whom the law requires us to pay them.

The "Excess Profits Tax," designed by Congress to help pay for the war and to prevent excessive war profits, is an 85½ per cent top-bracket tax which now leaves this Company with a smaller net income than it had in 1939. The Company is not making excessive profits. And our dividends have been reduced. The recent refund order would leave the Company with a return of only four and two-thirds cents on each dollar in the electric business, as fixed by the Commission This is too low.

If the 1943 excise taxes are valid, the return would be about four cents on the dollar. A return on its investment as low as either of these would most certainly damage the Company's ability to continue its present good service.

Rate cuts have many times been made by The Detroit Edison Company voluntarily. Today Detroit Edison's rates are among the lowest in the world. Since 1918 there have been some 40 reductions in our charges for various classes of service. Today your residence electricity costs you only half as much per kilowatthour as it did in the last war.

We intend to keep up this good record in the future.
