cooking, lighting and appliance use.

INVISIBLE SABOTAGE... Production of highly sensitive instruments for war can be halted by air-borne particles 100 times smaller than the naked eye can see. Some products are ruined by only a slight contamination of the atmosphere. Air that is fit to breathe may not be clean enough for certain manufacturing processes. These tiny particles cannot be removed by ordinary mechanical filters. But cleaning the air by electronic precipitation traps particles as small as one 250,000th of an inch... and even removes tobacco smoke and oil mist. The process is now limited to use in vital war installations, but will be available after the war to hospitals, radio stations, offices, stores, restaurants, and in homes as well.

SPRING TASTE-TEMPER... A delicious dessert from our Home Service Department:
Rhubarb Cobbler
1/2 cup sugar or 1 lb. rhubarb (3 cups) cut in 1-inch pieces
Combine rhubarb, sugar and water. Bring to a boil and pour into greased 7-1/2-inch utility dish or into individual casserole. Place biscuits on rhubarb and bake for 20 minutes in a preheated 400° F. oven.
Biscuit Topping
2 cups sifted all-purpose enriched flour
4 tps. baking powder
1/2 cup salt
1 egg
1/2 cup milk
Sift flour, baking powder, salt and sugar together. Cut in shortening. Add milk to beaten egg, and add to flour mixture to make a soft dough. Turn out on floured board and roll. Cut in desired shape and place over rhubarb sauce. Serves eight.
Don't waste electricity during the coal shortage

CLEANING CRAFT... If furniture to be polished is first wiped with a cloth dipped in vinegar, it will polish easier and show no finger marks.

Coal Users Urged To File Consumer Declarations Now
Birmingham coal and coke users are just beginning to file consumer declarations and placing orders for their supplies for the next 12 months. Recently Edward G. Crowley, area distribution manager for the Solid Fuels Administration for War, emphasized the advantages which result from filing out their forms immediately.
"Those consumers of residential types of coal, coke and other solid fuels who fill out their declarations and put them, along with specific orders, in the hands of their regular dealers between April 1 and May 10 will be entitled to special preferential treatment," Mr. Crowley declared.
"Those consumers who wait until after April 1, he explained, "require dealers to deliver at least 30 per cent of a full normal year's supply before October 1 to customers who file their declarations plus their orders between those dates. They must be willing, however, to accept the kinds of unstable solid fuel which dealers can supply."
"The coal in a consumer's bin at the time he files his declaration is just so much 'velvet,'" the Solid Fuels official said, "since, unless the coal is bought in large quantities, it will not be counted as part of the year's allotment. Under no circumstances, though," he added, "can more than 80 per cent of a normal year's supply be delivered after April 1. In other words, householders must make four tons do the work of five. And every pound that is burned from now on comes out of the amount available for next winter."

First Methodist Church
On duty at the west of Birmingham since 1927.
