Just three reasons why

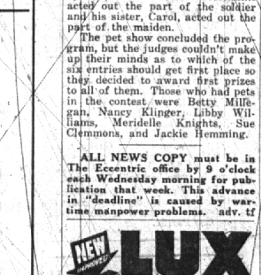

"IT'S A TOUGH ROAD TO TOKYO"

1. Fighters
Japan has 4,000,000 to 5,000,000 first-string fighting men right now, ready for us, waiting for us. Waiting till we get closer. And in addition, 1,000,000 men of military age who have not been called to the colors and more than 1,000,000 physically fit young men between 17 and 18 years old who have only recently been subject to the draft. Yes, 6,000,000 to 7,000,000 Japs that we haven't yet tackled—that's one reason why "It's a tough road to Tokyo."

2. Materials
The Japs have been making and gathering war supplies for years and years. They have huge stock piles of vital war materials—reserves of high-octane gasoline, oils, rubber, fuels, steel, chrome, nickel, manganese—and they have mines and mills and plants constantly producing more. They have almost no consumer production, virtually everything is war production. That's another reason why "It's a tough road to Tokyo."

3. Workers
In Japan's island home alone is a vast army of 35,000,000 workers fighting for her fighters—seven-days-a-week workers. There are millions more in Manchuria, Korea, and Formosa. And an almost unlimited supply of manpower in conquered territories. Untold millions in conquered lands can be forced to work for Japan—Japan's war-worker strength is mighty. But—these are only three of a thousand reasons why "IT'S A TOUGH ROAD TO TOKYO."

Says Lt. General Eugene Reybold, Chief of Engineers:
"It will take hard work and a grueling fight. Besides that, it will take all our patience to beat the Jap. Every American is eager for the big attack, but before we can hurl the full weight of our Army against Japan, we must build places for them to live and fight from. Airstrips, camps, hospitals, roads, bridges. Bases on Okinawa, Iwo Jima, in the Philippines. We are building now with utmost speed, and in these tense months we need your work, your backing, and your patience."
