THE CHRISTIAN TEMPLE

The Place of Friendly People

PUT SOME MONEY IN YOUR SOIL **BANK** ACCOUNT

High-potash fertilizers are a good investment. With prices of potash still at low prewar levels and prices for farm products at high wartime levels, greater profits than ever before can be obtained for every dollar spent for this necessary plant food.

Not only maintain but build up the fertility of your soils. Now there is plenty of potash to make the high-potash fertilizers recommended by your official agricultural advisers. Use these fertifizers in the amounts suggested for your particular soils and crops.

Write us for further information and free literature on the practical fertilization of crops

"THE 21/2-TON TRUCK IS OUR **MOST VALUABLE WEAPON"**

Behind the hard-hitting, fast-moving armored spearheads of General Patton's Third Army are thousands of 2½-ton, "six-by-six" military trucks. Without these vital transport vehicles, his tanks and troops would lack the food, fuel and fire power needed to keep the offensive rolling. In just one day of fighting, a single heavy tank consumes around 500 gallons of gasoline and one Armored Division requires about 600 tons of ammunition and 40 tons of food. Yes, it's a big job of supply in anyone's language and trucks are rolling day and night to see that it's done. It's a big job to build these trucks too, and GMC Truck & Coach is the nation's largest producer. To see that it's done, GMC needs more workmen now. Whether you have had previous factory experience or not, stop by today and apply for a home front job that will help speed Victory on the fighting front.

GET A WAR JOB and Stay on the Job

Victory depends on everyone, every day. Lost time puts a brake on America's final drive for Victory. Whether you're working at GMC or on some other job, stuy on it every limitude. Under war conditions, this is loughbut war is never leasy. Reduce absentesism and make time work for us — not the Axis.
