**How smart have you been for the past 3 years?**

**THINK**, for a minute, about what's happened to most of us at home in the last three years.  
Chances are, you've had all the work you could handle at higher wages than ever before.  
In spite of higher taxes and somewhat higher prices, you've netted more hard cash than ever before.  
You've made more money — you've had less time to spend it — and, for a couple of years now, there's been less and less stuff to spend it on.  
On top of that, you've had trust that at every turn the finest chance this world has ever seen to save and invest that money.

You've been asked to invest in War Bonds which, when held to maturity, pay you back \$4 for every \$3 you put in. Through the Payroll Plan, it's been made easy for you to buy those Bonds automatically — to save bigger amounts with greater regularity than most of us were ever able to save before.  
In the last three years, in short . . . You've had the chance of a lifetime to accumulate money! Money for your old age — money for emergencies — money to set you up in business — money that can help make this a healthy, prosperous country for your boy when he comes home from war!

Did you grab the chance? Have you been backing this war to the limit with your dollars — have you been buying all the War Bonds you could and hanging onto them like grim death?  
If you have — fine.  
If you haven't — well, it's not too late to start right now. But you ought to get in and pitch doubly hard, to make up for lost time — and money!
