From Bustles... TO BOBBED HAIR... To Bobby Sox

Big things have happened in women's fashions since 1904... and since 1918. Yes, and the big changes have taken place in the telephone system since bustles were "the rage."

• In 1904, Michigan Bell had only 65,000 telephones. Total cost of buildings, equipment, wires, telephones, etc., was only 10 million investment dollars.

• By 1918 there were 260,000 telephones; the cost had risen to 38 million dollars.

• Beginning in 1945 there were 1,122,000 Michigan Bell telephones, and the cost stood at 242 million investment dollars.

You see, to add more telephones, and continually improve service, we must invest more money for central offices and switchboards, more for wire and cable — more for everything it takes to provide service.

Right now, 125,000 families want service that we can't supply. We already have started work on a 5-year \$120,000,000 program to enable us to fill waiting orders... to care for future growth... to resume extension of rural service... to put into use new technical improvements... and to give you the service you want in the future.

Rates charged for telephone service do not supply sufficient money for expansion. Such investment dollars must come from the savings of thrifty Americans willing to buy Bell System securities. And — in order to attract

their money — earnings must be sufficient to assure reasonable dividends, now and in the future. If not, those folks will place their money elsewhere.

The future quality of your telephone service depends on telephone rates sufficient to produce earnings attractive to investors. Too long a continuation of inadequate earnings would weaken our ability to meet expected post-war telephone needs.

Michigan Bell customers want good service. The telephone bill is so small an item in their regular expenditures that customers want really good service even though it might cost a trifle more than they would need to pay for inferior service.
