Tighter enforcement of Michigan liquor control regulations is resulting in a new campaign by wets to get the state out of the liquor business.

A fair sample of the enforcement commission of the state liquor control commission: Licenses cannot transfer their liquor licenses to another person for a period of one year after they have been obtained.

A minimum 30-day investigation period now prevails for transfer requests. The assessment to defray cost of investigation into license transfer is raised from \$1 to \$35.

More strikes in Michigan are in the offing as a result of the 18 1/2 cent per hour wage increase given to automotive, steel, electrical, railroad and coal mining workers.

Coal prices in Michigan are expected to rise from 35 to 60 cents a ton. Wage increases must be paid by the consumer.

The legislative bonus committee will meet June 26 at Lansing to consider its final report. It is likely that the voters will be given an opportunity to authorize or reject a bond issue.

Michigan peach and sour cherry prospects are good for 1946. Apples, plums, grapes and strawberries.

Charles M. Ziegler, state highway commissioner, says fewer roads and bridges will be built this year because of the coal and steel strikes.

West states into near-collapse. While Michigan farm and is now selling at 108 per cent of the 1920 price peak.

Based on all the evidence now at hand, it would seem prudent for farmers and business men to brace themselves for a long and hard winter.

When we do a \$100,000 farm, the first change by a general improvement of the buildings. Farm barns and houses are paired and repaired. Fences also are sprung up, sometimes with a white coat added for glamor.

War workers have been seeking to attain security against another depression. Life savings are being invested into a cabin and a plot of land in northern Michigan.

In World War I and postwar years the value of farm land rose 65 per cent before cracking. The price has risen 60 per cent from its prewar base, and the rise is gaining force.

By 1950—just four years away—farm earnings are due to drop to 40 per cent, or 5 per cent according to federal forecasts. And yet farm land is attracting city dollars in an increasing rate.

The year 1946 is not a good time to go into debt. It's a good time to get OUT of debt. To illustrate: Winthrop W. Aldrich, chairman of the board of directors of the Chrysler Corporation, recently warned: "Inflation exists to an alarming degree and reckless spending is the result."

Without a doubt, chief editorial writer, Chicago Journal of Commerce, speaking on the subject, "Is the Country Going to Hell?" said that the answer is in the affirmative. "It may be possible," he added, "to call a halt at the edge of the pit."

Based on all the evidence now at hand, it would seem prudent for farmers and business men to brace themselves for a long and hard winter.

The Truman Administration's policy of encouraging higher wages has been a disaster. It has been calculated that General Motors employees will have to work nine hours and get the wages they had during the long costly strike against the management last winter.

Since the GM employees got their higher wages, the OPA has granted two raises in the price of automobiles. A third is anticipated. Higher wages for coal miners will bring only higher prices for every one.

Although we have more education than any other people, the state of economic literacy among our people is appallingly low.
