These 5 Men May Save the World. This group of 5 distinguished Americans was cloistered together by Uncle Sam for 8 long weeks. They had a supply of midnight oil to burn. And the toughest problem of the century to lick. The problem? To draw up a plan by which mankind can conquer, not be conquered by, Atomic Energy. Now that their plan has been drawn up, it's being hailed both here and abroad. But it still lacks a most important element. In the words of one of the group, TVA's David E. Lilienthal: "... our plan must be understood and treated by you and all the people of the world. We have the frame of a plan, but it's your living room talk, your arguments around the table, in your clubs and around headquarters, which will put life in it." That's the job "This Week" Magazine has set for itself. We've invited Mr. Lilienthal to give you the plan in our pages. Here's an article that affects the lives of every man and woman in the land. Written in your language... so that you'll read it Sunday in "This Week" Magazine 2... and help America do something about it... before it's too late.
