Printers Can Be Intelligent

An average printer goes little beyond the customer's name and address. A good printer (and there are a number of them) gets to know "almost" as much about a man's business as the man himself. Most of our success has come from learning the sate to which printing is put. As a result we are looked to for help and counsel in developing the printed piece. If you are not getting top-notch, intelligent co-operation from your present printing supplier, we'd appreciate an op-portunity to tell and show you what we have to offer.
