

Interviews Five June Graduates

School, were interviewed during the past two weeks by Carroll Munnshaw, superintendent of schools, it was learned today.

Munnshaw reported that two girls, Helen Greene and Mary Louise Lacy, are attending the University of Michigan, while Betty Collier, Mary Louise Holland and Robert Bradley are on the campus at Western Michigan College at Kalamazoo.

"In each case these five students are doing as well or better than they did in high school, if their marks so far are an indication," he stated. "They have made a surprising rapid adjustment to college life. Apparently attendance at a small high school is not necessarily an inadequate preparation for college," he continued.

Over-Crowded Conditions.
According to Munnshaw, the average college mark for these five students up to this period is between C plus and B minus. Their average high school grades were also between C minus and B minus. This is a rather remarkable achievement in view of the fact that present over-crowded conditions in the colleges make study extremely difficult and the presence of so many mature veterans makes the competition unusually severe.

It was revealed that other members of last year's class are attending Cornell University, Western College at Oxford, Ohio, Rollins College, the University of Wyoming, Dakota Wesleyan University, Iowa State College and Stephens College.

"Unofficial reports indicate that students at these colleges are doing equally well. Official reports on their work will be received later in the year," Munnshaw announced.

Residents Asked to Give Seed for Foreign Gardens
By Alice Morgan
"Did the Finnish children get the seeds?" "Did the seeds get there in time for planting?" "Did they grow?"
These are some of the questions which many who supported the American Friends Service Committee (Quakers) request for seeds last year have been asking. Now they can be answered, for the children did receive the packets in time for planting, and many a family benefited greatly because of them.

While this was, and still is, primarily a children's project, many adults of Birmingham gave generously last year, and seeds for 100 gardens were finally sent to Finland. American children have undertaken this project in order that the children of Finland might have summer gardens, and help out in the great time of need.

Letters of Thanks
Among some of the letters which have been received here are:
"Dear American Children:
"Thank you for the gift package you sent us. I sowed the seeds in the ground myself and each time that I go to tend them and look at the tendrils, I remember you, my dear American school children. Cultivating the grounds I recall to mind you are overseas. You have done a great deal for our sake and for which I wish to thank you. The war has wrought a great deal of destruction here. Many have lost their homes and their lives, in behalf of their fatherland. My father was among those who lost his health during the war."
"Our land is beautiful. Her nature is charming, for Finland is the land of the 100 gardens. A great many schools have been built in Finland in which we are taught to love our fatherland, to thank God for our beautiful land, and to pray for God's blessings for it."
Another letter, from little Linda Sarkola, says that she usually starts her walk to school at 6 o'clock in the morning, not being fortunate enough to have a bicycle like some of the other children.

Midnight Sun
From a teacher in northern Lapland comes this letter: "We have planted everything and now we are waiting for our potatoes. The potatoes already have begun to show plants, and the rye will soon bloom. Since it is so late here in summer everything grows fast. Just now we have the nights which are not nights because we always have sun! It is so light during two months that we do not need lamps. Our village is in Lapland, in the commune of Sino, the village of Makiemi, near the town of Kem. Our village is a farming village, with some farming and cattle."
"Our school is perfect. We have 17 pupils in the lower and 29 in the higher school, and 13 in the continuing school. The children are very nice and so are the grown up people. Hardly any crimes happen in our village."
"We still live poorly after the war, but the American Quakers and the UNRRA have helped us much and made our life better." The letter was signed "Ahti Turunen."

The project is being continued again this year, with the most urgent appeals being made for Poland, Hungary and Japan. Poland has suffered during the past year from floods, and the need is especially great there. They have been near famine for years, and with the war and floods are in dire need of food stuffs.
Each garden this year will cost \$5.00, five cents less last year. This will provide enough seed to sow a plot 30 by 40 feet, with a harvest sufficient to feed two adults and three children. Churches and classes are urged to back this wonderful project.

Nobel Peace Award
That the work of the American Friends Society is of international importance was made clear when the Nobel Peace Prize, which was awarded the \$50,000 Nobel Peace Prize. This is the first time in history that this prize has been given to any organization. The groups immediately made public announcement that the money would be turned back into relief work channels.
Local contributions for seed packets should be in the hands of the committee not later than January 1. Mrs. Paul L. Fairfield, Mrs. Blair K. Swartz and Mrs. John K. Ormond made up the committee which is headed by Mrs. Philip Pretz to handle these donations in Birmingham.

Kresge Employees to Receive Bonus
Forty-two regular and part-time employees of the S. S. Kresge Company at 157 N. Woodward will share in an enlarged Christmas remembrance plan this year. Under the revised schedule, cash remembrances for part-time and Saturday employees have been increased. Large gifts will be given to the Kresge Company determines the individual amounts of the remembrance gifts.
According to Manager H. L. Sellers of the local Kresge store, the Christmas remembrance plan has been in effect since the organization for more than 26 years.
