**Plenty of Running Water Means All These Things for You!**

In the farm kitchen alone, 37 tons of water are used each year. An average cow drinks over 15 tons a year... and there are dozens of other uses for water. Let electricity take this burden off your shoulders—leave more time for more important work. Electricity will pump and carry your water cheaper than doing it any other way. No other system will give you so much satisfaction!

**Better Milk Production**  
 When dairy cows have ample fresh water, they produce 2 to 10% more milk.

**More Profitable Hogs**  
 Plenty of water at the leading trough means bigger, healthier hogs.

**Added Fire-Protection**  
 A small fire's easily controlled with a stream of water. Without it, fire can spread rapidly.

**Healthier Horses**  
 Water your livestock frequently—they'll be healthier, do better work.

**Extra Crop Insurance**  
 Drought can ruin valuable vegetable and flower crops. Water guards your garden.

**Complete water systems and electric pumps of all types and capacities, for use in shallow wells, deep or shallow wells, are available for immediate installation. Ask your Edison Farm Service Advisor to help you plan your system and estimate the amount of water your farm requires. There's no obligation to you, and you'll find his services helpful.**
