Cadillac

ANCESTRY

The new Cadillacs you see today on the streets and highways of America have been more than forty-five years in the making. Back of them is a long line of fine, pioneering ancestors—every one of which has made a basic contribution to Cadillac's development. Without this long background of experience, today's Cadillac could not be built—for character in a motor car is like that in a human being—it is a long time in the making.

If you are waiting for a new Cadillac—please be assured that every effort is being made to further production. Demand is so great, however, that some delay in delivery is still inevitable. But hold to your purpose! There is no substitute for a Cadillac.
