COSTS NO MORE

So why accept less than the best? Your car is a big investment and must be properly protected. Correct lubrication is the first line of protection for your car.

A lubrication is more than changing the oil and grease. It's a job of lubricating and greasing many points that are subject to wear. Knowledge of those points, knowing how and what to do, having the proper equipment, materials and experience, make the difference between ordinary lubrications and factory specified lubrications.

The North Chevrolet Co., features expert lubrications at surprisingly low prices. North Chevrolet lubrications cover the following operations: Lubricate and change oil, pack front wheel bearings, pack rear spring covers, fill shock absorbers, change axle and transmission grease. The lubrication department at The North Chevrolet Co., is ready to serve you.
