PONTIAC

Product of General Motors

Above everything else... a good car!

Pontiac has one manufacturing principle which takes precedence over all others: Pontiac must always be a good car! There is no other motor car quality which people value so much as goodness. That's why Pontiac engineers and production specialists spend so much time and energy and money to insure Pontiac quality. Pontiac cars must last long—and they must last well—and they must function through the years with a minimum of upkeep cost.

Owners have been quick to appreciate this. Some of the testimonials they send to the factory, and to Pontiac dealers, tell of performance feats that seem almost impossible of attainment.

Pontiac has many other outstanding virtues, of course. It is a wonderful performer. It is delightfully comfortable and easy to handle. It is a great beauty, and unusually distinctive in appearance.

But its greatest virtue is goodness. This year, or any year, you just can't beat it for faithful performance.

General Motors Hydra-Matic Drive and White Sidevalve Tires and Bumper Guards optional at additional cost.
