All-New Fireball Engine—Yours without Delay

WINTER'S the time when an old engine really bogs down — when weak sparks fail to fire a charge of gas — when worn rings and compression leaks get in their dirty work.

But we've got the answer, right here waiting for you. We've got a brand-new Buick Fireball engine that will fit right in your prewar car — any Buick built since 1937.

In 12 to 15 hours — at a cost only slightly above a thorough overhaul — we can take the weary engine out of your Buick and put in a brand-new power plant.

These engines are built on the same assembly line as the engines in 1948 Buicks. They bring you all the 1948 engine features. They're all new — new pistons, rings, pins. New clutch and carburetor. New spark plugs, new wiring. Everything listed in the panel show is yours in this "power package."

Best of all, there's no waiting. Engine output at the factory is running ahead of car production — so your 1948 Fireball engine is waiting for you right now.

Steal a march on winter today. Come in and get all the facts — including our easy-pay terms.
