October 14 is Oil Progress Day!

## OIL PROGRESS BENEFITS EVERYBODY IN BIRMINGHAM

Every time you drive a car... ride in a bus... ship by truck... eat food produced on a tractor-powered farm... travel behind an oil-powered locomotive... you benefit from the tremendous progress made by the American petroleum industry.

For not only has this industry broken all records for the volume of oil products produced—but it has constantly improved those products.

Modern gasoline, for example, is far better than the gasoline of years ago—permits automobile, tractor and airplane manufacturers to build engines that get more power from every gallon.

So, today—we of Ethyl, who produce the "Ethyl" antiknock fluid that helps refiners step up the quality of their gasoline, salute the progressive oil industry.
