The real discoveries—the important discoveries—of the last-100 years have been made by men of science. Their work in research laboratories has opened new worlds—new worlds of freedom from disease. From pain. . from fear—new worlds of longer, healthier, happier living. And as each new drug or chemical is developed, and its value proven, that new product is to be found on the shelves of our prescription laboratory. This happens and its the work of the scientists—by how we aid in the work of the scientist aking their discoveries immediately ava your doctor and to you.
