How many times have you been in the middle of some odd job around the house and run out of materials? Without thinking, you start out to find more, and before you know it, the day's about over.
Later, you realize that a look in the telephone directory Yellow Pages and a few quick telephone calls would have found the right supplier... and you'd have been back at work.
The telephone is a valuable servant in every household. There's hardly a call you make that doesn't save minutes, or even hours, not to mention gasoline, oil or shoe leather.
And yet the cost of your telephone remains low. Right now it represents a smaller portion of the family budget than even before the war.

One of today's greatest values is the telephone
